CES

Why **LED**?

GREEN
Energy saving, no mercury, long life and less heat. LED is the most environmentally friendly light source other than sunlight.

EFFICIENT
LED's have an efficiency level of 90%, meaning that much of the energy is converted into light and is not lost as heat.

ECONOMICAL
ENERGY cost of an LED light source is 10 times less than traditional light sources. Meaning BIG savings on your energy bill.

VERSATILE
LED emits a wide spectrum of light sources and is adaptable for most common lighting for residential, commercial and industrial use.
